## Prognozowanie rozwoju nauki i techniki

**Horizon Scanning Centre**

<http://www.foresight.gov.uk/Horizon%20Scanning%20Centre/index.asp> The Horizon Scanning Centre has commissioned two complementary scans looking ahead up to 50 years : the Sigma Scan and the Delta Scan. Initial versions of both scans have been published by the contractors who developed them: [www.sigmascan.org](http://www.sigmascan.org) by Outsights - Ipsos MORI and [www.deltascan.org](http://www.deltascan.org) by the Institute for the Future (IFTF). The Government's horizon scanning function, located in the Government Office for Science, provides the strategic context to horizon scanning activity in government departments and elsewhere. It also informs the Government's strategy for public engagement with science to identify at the earliest possible stage areas where potential, safety, health, environmental, ethical, regulatory and social (SHEERS) issues may arise, and advise on how these might be addressed.

**Sigma Scan** [www.sigmascan.org](http://www.sigmascan.org) is a quality assured synthesis of some of the world's best Horizon Scanning sources. It covers future issues and trends across the full public policy

agenda. It is drawn from a range of sources including think tanks, academic publications, mainstream media, corporate foresight, expert/strategic thinkers, government sources, alternative journals, charities/NGOs, blogs, minority communities, and futurists.

**Delta Scan** [www.deltascan.org](http://www.deltascan.org) is an overview of future science and technology issues and trends, with contributions by over 200 science and technology experts from the worlds of government, business, academia and communication in the UK and US.

**Institute for the Future (IFTF)** is an independent, nonprofit research group with nearly 40 years of forecasting experience. The core of our work is identifying emerging trends and discontinuities that will transform global society and the global marketplace. We provide insights into business strategy, design process, innovation, and social dilemmas. Our research generates the foresight needed to create insights that lead to action. Our research spans a broad territory of deeply transformative trends, from health and health care to technology, the workplace, and human identity. The Institute for the Future is located in Palo Alto, CA.
