The Medical University of Białystok is a prestigious and dynamic higher school, distinct in its achievements and strengths. Every year, the University is classified high in national rankings. It has been training medical professionals for over sixty years. Currently, the total number of students is over 4800, including 248 instructed in English. The University offers two unique courses of study: Speech Therapy with Phonoaudiology, and Electroradiology (Master's degree level). One of the significant accomplishments in the past few years was the launching of a six-year medical programme in English at the Faculty of Medicine in 2004. The academic year 2011/1012 will initiate training students from the USA, in accordance with American standards. The University has been continually investing in developing its teaching and research facilities. This year will witness the opening of two newly built establishments: the Euro-regional Pharmacy Centre and the Faculty of Health Sciences Building. It is expected that in the year 2015 expansion and modernization of the University Teaching Hospital, which constitutes the basic teaching base, will be concluded. The seat of the authorities of the Medical University of Białystok is the 18thc. Branicki Palace, located in the city centre and surrounded by the University’s teaching departments, two teaching hospitals, dormitories and sports facilities, all within walking distance.

The Medical University of Gdańsk provides education to over 6000 students, PhD and postgraduate students. International students constitute of 10% of MUG students and represent more than half of all international students studying in Gdańsk. The University conducts classes in English for students of two degree programs: Medicine Doctor and Master of Pharmacy.

Students have access to a conveniently situated student residential campus, a modern library and a student club “Medyk”.

The University is intensively conducting scientific research which is reflected by its high position in the Polish Ministry of Science and Higher Education ranking and by many awards for its staff. Faculty of Pharmacy with Subfaculty of Laboratory Medicine has been recently recognized by the Polish government as a National Leading Scientific Centre (KNOW).

The Medical University of Gdańsk is constantly modernizing its didactic and clinical infrastructure. The construction of the Invasive Medicine Centre, financed by the national budget for 480mln PLN, was finished in 2011. It has been the first investment of this type in the Pomeranian region for 30 years. The new hospital comprises several parts housing 12 surgical departments, with bed space for 311 patients. The Invasive Medicine Centre’s didactic part includes an auditorium with 288 seats and several seminar halls. Whereas its roof has a helicopter landing pad connected directly to the Emergency Department.

The Medical University of Gdańsk carries out active international exchange within “Lifelong Learning Programme”, takes part in Baltic Sea Region University Network (BSRUN) and ScanBalt.

The Medical University of Gdańsk provides health care to the inhabitants of the Pomeranian Region and the neighbouring regions, as well as actively supports public health projects. The University organizes Medical Education Day and Picnic for Health, the events which serve to increase pro-health awareness in our region.

Since 2009, the University has been a member of “Study in Pomorskie”, a programme which promotes our region’s universities abroad.

The School of Medicine in English is a structural unit of the Faculty of Medicine. Its first students were admitted in October 1994. During the 2008/2009 academic year, over 480 students from five continents and twenty countries were enrolled in the School, with the majority coming from Norway, the USA, and Canada. The School offers two programs of medicine, taught exclusively in English. This first is a 4-year program for graduates of pre-medical college/university programs in the USA/Canada and the second is a 6-year program for graduates of secondary schools. Graduates of these programs are conferred a Doctor of Medicine (MD) degree by the Jagiellonian University Faculty of Medicine. Academic staff include the most experienced scholars and lecturers at Jagiellonian University, as well as foreign academics from the USA, England, Germany, and other countries.

These English-language programs remain in compliance with Polish and EU standards of teaching, the US Department of Education (Stafford Loan Program), and Medical Board of California.

Medical University of Lublin was founded in 1944 after the end of World War II. Nowadays, its didactic and scientific structure is composed of four faculties: Medical Faculty I with Division of Dentistry, Medical Faculty II
with English Division, Faculty of Pharmacy and Faculty of Nursing and Health Science. In Lublin there are three hospitals affiliated with the University and offering excellent training programs and facilities for students in almost every field of medicine. The University hospitals provide medical services for the city, the province and the region. In academic year of 2010/2011 there are approximately 900 international students attending medical and dentistry faculties in American (mainly USA and Canada), European (mainly Scandinavian countries), Asian (mainly Taiwan) and Arabic (mainly Saudi Arabia) programs. Those students represent over 36 countries worldwide. We are proud to have the accreditations of New York and California States, we are also recognized by the Saudi Arabia government.

Medical University of Lodz was inaugurated on 1st October 2002, as a merger of two higher education institutions: the Medical Academy and the Military Medical Academy. Medical University, as one of the biggest state medical universities in Poland.

The concept of up-to-date and comprehensive professional training of medical manpower is being improved all the time. The process of education has been focused on preparing specialists for work in various communities and national health care systems. Our educational offer, gradually and consequently modified and widen, has been adjusted to requirements laid down in the resolutions of the European Union. Following Poland’s entry into the European Union the University offers an automatic recognition of the degree for most of the faculties within the European Union.

Currently, over 8,500 Polish students are receiving their education within medical and medicine-related areas at various faculties and nearly 400 foreign students from various countries attend medical and dental courses.

Poznan University of Medical Sciences (PUMS) is one of the best and largest medical universities in Poland with 90 years of academic experience and with great potential for development. Our University is a leading medical school in Poland. It is a major educational, research and clinical center. Clinical teaching and research are mainly based on cooperation with 6 clinical hospitals. Altogether, there are more than 8200 students studying currently at the University, among which there are 1008 students of the English Language Programs. The University continuously seeks to develop learning process and teaching techniques. Therefore, it broadens the cooperation with foreign institutions and universities in terms of joint research, joint participation in international programs and research projects as well as in joint publications and scientific conferences, exchange of students and teachers. PUMS cooperates with many foreign institutions from the whole world.

Poznan University of Medical Sciences began the careful planning of an exciting new medical curriculum, a competency based curriculum. In this curriculum, students are given specific subject matter and clinical objectives and outcomes by the faculty. Consequently, expectations and evaluations for students both in the basic sciences and in the clinics are made very clear. In addition, students will be instructed in communication skills, professionalism, interpretation and use of the scientific literature, diagnostic and treatment skills, rapport building with patients, sensitivity to moral, ethical, cultural, and social issues and life-long learning skills. Students will also receive training in problem based learning through extensive use of clinical vignettes in their
basic sciences. The implementation of this curriculum, to be put into place in the near future, will make our Medical School a unique institution for students looking for a strong academic program where academic and clinical expectations are clearly defined. Such a curriculum will greatly increase the value of the degree at PUMS and facilitate good residency placement.

The University is widely recognized around the world. English programs are accredited, among other institutions, by US Department of Education, Educational Commission on Foreign Medical Graduates (ECFMG), National Board of Medical Examiners, Medical Board of California, loan institutions in USA, Canada and Scandinavia.

Pomeranian Medical University in Szczecin

Pomeranian Medical University was founded in 1948. Viewed from its historical perspective, when compared with the multi-centennial tradition of other universities, a period of 60 years is short indeed. However, the Pomeranian Medical University due to its continuous development is well recognised both in Poland and in the world. Our University enters the international cooperation with foreign institutions, among them are: Ernst Moritz Arndt Universität, Greifswald, University in Rostock, Uckermark Gmb Clinic in Schwedt; Julius Maximilian-Universität Würzburg (Germany); University in Lund and in Goeteborg (Sweden); Pennsylvania University (USA); Nantes University in France; Degli Studi di Bari University in Italy; Hedmark University College in Elverum (Norway); Trakia University in Stara Zagora (Bulgaria); Universidad De Malaga in Spain. Aims of international cooperation are scientific researches and projects; students and staff exchange; scientific conferences; common publications and periodicals. University’s main fields of scientific achievements which were patented:
- determining a predispositions to cancer (NBS1;CHEK2);
- polymorphism in the human NBS1 gene useful in diagnostics of inherited predisposition to cancer;
- pharmaceutical compositions and methods for the prevention of breast and ovarian cancer;
- method for determining reduced predisposition to cancer based on genetic profile.

Each of the University Departments have achievements to their credit.

Main Library of the University has permanent access to internet databases: MEDLINE, SCOPUS, Science Direct, Wiley InterScience, Journals@Ovid, DynaMed, ERIC, Science Direct; Cochrane Collection; ProQuest Science and Technology; ProQuest Medical Library. These factors contribute to a promising future of the University as well as of our students.

At present, the Pomeranian Medical University in Szczecin has almost 4064 students of medicine, dentistry and nursing. Among them there are 494 students of English Program of both faculties: medicine and dentistry. The Pomeranian Medical University has offered the English Program since 1996 on the Faculty of Medicine and on the Faculty of Dentistry since 2006.
